

Ultra-Secure® Plus

Single Premium Deferred Annuity

POLICY HIGHLIGHTS

It's never too early to start planning for retirement. When selecting the most appropriate retirement vehicle for you, keep in mind your investment objective, risk tolerance and investment time horizon.

A single premium deferred annuity is a product, that for a single initial investment, earns a fixed rate of interest and your money grows tax deferred until you decide to begin receiving annuity payments.

If tax-deferred growth and a fixed rate of return are important to you, Ultra-Secure® Plus offers rate guarantees of five and seven years that may fit your needs.

MARKET VALUE ADJUSTMENT

If you request a cash surrender or partial withdrawal, a market value adjustment may be applied. If the interest rate at the time of cash surrender or partial withdrawal is higher than the interest rate guaranteed for the Interest Rate Guarantee Period, the market value adjustment will always be downward. If the interest rate at the time of cash surrender or partial withdrawal is lower than the interest rate guaranteed for the Interest Rate Guarantee Period, the market value adjustment will usually be upward. There will be no interest adjustment to the cash surrender value if you surrender, renew or choose a payout option during the renewal period, or withdraw money under the 10% withdrawal amount provision.

A market value adjustment is calculated as follows:

- (a) The guaranteed Interest Rate for the current Interest Rate Guarantee Period; minus
- (b) the initial guaranteed Interest Rate being credited to Purchase Payments for new contracts of this form excluding any Interest Rate increase that:
 - (1) applies for the first contract year only; or
 - (2) is added by Rider; minus
- (c) 0.0025; multiplied by
- (d) the number of months left before the end of the then current Interest Rate Guarantee Period;
- (e) Divided by 12; plus
- (f) 1.
